QUALITY POLICY

Porkka Finland Oy develops, manufactures and sells professional cold and freezer cabinets, cold and freezer rooms, counters and clean rooms.

Our target is to be on the forefront in development of our branch and we take quality into account in all our activities. We use our management system to develop the whole supply chain. We make sure, that everyone working for Porkka Finland Oy perceives the importance of good quality for the success of the company and is responsible for the work they do and its quality. The company management creates the conditions for our entire staff to work according to the quality system and the processes of the company. We minimize nonconformities in our processes and maximize delivery reliability of products and services.

Customer orientation is the cornerstone of our business. We take care of competitiveness of our products and services by understanding the customer's business and related needs. By actively pursuing standards and regulations, we make sure that our products fulfill the requirements currently and in the future throughout their entire life cycle. Through high-quality operations and continuous improvement, we are aiming at permanent trust of our customers, continuity of operations, good profitability and growth for our company.

PORKKA FINLAND OY
